

EU AI Act “Annex IV

Technical Documentation for High-Risk AI Systems

Regulation (EU) 2024/1689 “Article 11 & Annex IV

Generated: March 15, 2026 at 10:36 PM PDT

System Under Assessment

Cluster:	kind-yikes-demo
Namespace:	acme-prod
Total Workloads:	10
AI/ML Workloads:	0
Infrastructure Risk:	79/100
Annex IV Score:	24/100
Assessment:	Non-Compliant

Annex IV Section Assessment

Section	Title	Article	Status	Score	Gaps
AIV.1	General Description of the AI System	Annex IV “1	GAP	30/100	1
AIV.2	Elements and Development Process	Annex IV “2	GAP	20/100	1
AIV.3	Monitoring, Functioning and Control	Annex IV “3	GAP	25/100	1
AIV.4	Risk Management System	Annex IV “4, Art. 9	GAP	25/100	1
AIV.5	Data and Data Governance	Annex IV “5, Art. 10	GAP	20/100	1
AIV.6	Cybersecurity Measures	Annex IV “6, Art. 15	GAP	10/100	1
AIV.7	Accuracy, Robustness and Cybersecurity Levels	Annex IV “7, Art. 15	GAP	30/100	1
AIV.8	Human Oversight Measures	Annex IV “8, Art. 14	PARTIAL	35/100	0

AIV.1 “ General Description of the AI System

Status: **GAP**

Score: 30/100

Annex IV §1

A general description of the AI system including its intended purpose, the persons and entities that developed it, and the date and version.

Evidence Collected

- Cluster: kind-yikes-demo
- Namespace: acme-prod
- Total workloads: 10
- AI/ML workloads identified: 0

Documentation Gaps

! No AI/ML workloads detected “ classification may need manual review

AIV.2 “ Elements and Development Process

Status: GAP

Score: 20/100

Annex IV Â§2

Detailed description of the elements of the AI system and of the process for its development, including methodologies and techniques used.

Documentation Gaps

! No CI/CD pipelines detected in cluster “ development process documentation needed externally

AIV.3 “ Monitoring, Functioning and Control

Status: **GAP**

Score: 25/100

Annex IV Â§3

Detailed information about the monitoring, functioning and control of the AI system, including its level of accuracy, robustness, and cybersecurity.

Evidence Collected

- NetworkPolicies: 3
- Cluster risk score: 79/100

Documentation Gaps

! No monitoring/observability workloads detected “ Article 14 requires human oversight measures

AIV.4 " Risk Management System

Status: **GAP**

Score: 25/100

Annex IV Â§4, Art. 9

Description of the risk management system in accordance with Article 9, including identification and analysis of known and foreseeable risks.

Evidence Collected

- Risk scoring: 10 pods assessed with 0-100 blast radius scores
- Critical-tier pods: 8
- High-tier pods: 1
- Cluster risk score: 79/100
- RBAC critical findings: 0

Documentation Gaps

- ! High cluster risk score " risk management measures insufficient for high-risk AI systems

AIV.5 – Data and Data Governance

Status: **GAP**

Score: 20/100

Annex IV – 5, Art. 10

Description of data governance measures including training, validation and testing data sets, data quality, and any data biases.

Evidence Collected

- Data store: search-service (Search Engine)
- Data store network segmentation: 30% pods have NetworkPolicy
- Pods with secret access: 0

Documentation Gaps

- ! Insufficient data governance controls – data stores lack network segmentation and access controls

AIV.6 “ Cybersecurity Measures

Status: **GAP**

Score: 10/100

Annex IV §6, Art. 15

Description of cybersecurity measures taken, including protection against attempts by unauthorized third parties to exploit vulnerabilities.

Evidence Collected

- Critical CVEs: 1042
- High CVEs: 11696
- Privileged containers: 1
- Root containers: 3
- Internet-exposed pods: 7
- NetworkPolicy coverage: 30%

Findings

- * 1042 critical CVEs require immediate remediation
- * 1 privileged containers violate principle of least privilege

Documentation Gaps

- ! Cybersecurity posture insufficient for high-risk AI system deployment

AIV.7 – Accuracy, Robustness and Cybersecurity Levels

Status: **GAP**

Score: 30/100

Annex IV – §7, Art. 15

Information about the levels of accuracy, robustness and cybersecurity of the AI system and any known limitations.

Evidence Collected

- Infrastructure risk score: 79/100 (lower is better)

Documentation Gaps

- ! No AI workloads detected for accuracy/robustness assessment

AIV.8 “ Human Oversight Measures

Status: **PARTIAL**

Score: 35/100

Annex IV Â§8, Art. 14

Description of human oversight measures, including technical measures to facilitate interpretation of outputs.

Evidence Collected

- Authentication service: auth-service
- RBAC enforcement: 10 pods audited

Assessment Summary

This report assesses the Kubernetes infrastructure hosting AI/ML workloads against EU AI Act Annex IV technical documentation requirements. The assessment covers 10 workloads across the 'kind-yikes-demo' namespace in cluster 'kind-yikes-demo'. 0 AI/ML workloads were identified and assessed for compliance with Regulation (EU) 2024/1689.

Overall Annex IV Score: 24/100 â€” Non-Compliant

Sections assessed: 8 | Documentation gaps: 7

Disclaimer

This assessment is generated automatically by Reflex from Kubernetes infrastructure data. It provides evidence about the deployment environment but does not constitute a full Annex IV technical documentation package. Organizations must supplement this with documentation about training data, model architecture, validation procedures, and intended use cases. Consult legal counsel for full EU AI Act compliance.
